

National Poison Prevention Week

March 17 – 23, 2019

Each year during the third week of march, poison control centers nationwide celebrate National Poison Prevention Week. Poison centers help to eliminate thousands of unnecessary and expensive emergency room visits by offering callers access to free, confidential medical advice. Medical experts are available 24/7/365 to help in the event of an emergency or exposure, and to answer all of your poison related questions.
